Experience

Capstrat
Front-end Web Developer
February 2015 - Current
Raleigh, NC

- Wordpress Development, creating custom themes and architecture. Experimenting Bedrock, a modern Wordpress stack that uses composer to install WP core and all plugins.
- Experience with taking over legacy projects that use Phonegap and being able to get set up locally and maintain the project while pushing updates to the Android / iOS Applications.
- Created a custom static site boilerplate that uses Gulp to build out the website files, so we could easily hand off files to clients who will do the integrations themselves.
- Worked with the Development team to help refine processes and come up with some new deployment strategies that would work best for our type of projects.
- Technologies: HTML5, CSS3, Javascript, jQuery, Angular, WordPress, PHP, JSON, Ansible, Vagrant, Gulp, Composer, Yeoman, Bower, Git, PhoneGap

Atlantic BT
Web Developer
September 2013 - February, 2015
Raleigh, NC

- My primary role with Atlantic BT began as a Front end developer, developing standards-compliant responsive websites using HTML5, CSS3, SCSS, jQuery, and PHP.
- Worked with the Programming, Creative, and IT departments to refine processes and introduce new tools and technologies to improve workflow and efficiency.
- Heavy focus on Magento and Wordpress integrations.
- Created a Yeoman generator to quickly scaffold out our standard boilerplate for Wordpress websites, tremendously cutting down initial project setup time.

Autoshop Solutions
Web Developer
October 2010 - September 2013
Apex, NC

- Worked with a creative team of designers and developers to produce custom standards-compliant websites for clients at a fast pace.
- Front-end and back-end development using HTML, CSS, JS/jQuery and PHP/MySQL for client websites, internal web applications, mobile websites, and enterprise systems.
- Integrated various third-party platforms and services such as WordPress, Magento, Sophio, Volusion and others into client websites.
- Worked with marketing specialists to improve on-site search engine optimization.

Education

Panther Creek High School - Cary, NC — 2010
